

Final Year Project Instructions

Student Number: C18441084

Once the files have been cloned from Github, make sure that node is installed globally across your system. The following link will be instructions on how to download node: (<https://nodejs.org/en/download/>). Once node is installed, run the command *npm install* in the same location as package.json. Once that is completed, the code can be run by typing *yarn start* in the terminal.
